REDEFINING IDENTITY MLK SPIRIT AWARDS

JANUARY 4 - 22, 2017

DUDERSTADT CENTER GALLERY

Redefining Identity

Stamps in Color (SiC) is a student led organization dedicated to increasing the creative, social, and professional opportunities of peers, faculty, and staff of color at the Stamps School of Art & Design. SiC organizes an annual winter semester exhibition at the Duderstadt Gallery in partnership with the U-M MLK Symposium. The 2017 exhibition theme: Redefining Identity.

Redefining Identity seeks to reject/reveal/debunk society's definitions of identity and replace it with one's own vision through a variety of mediums. Judges will look for artwork that best portrays an individual's sense of self awareness, ability to challenge misconceptions of ethnic groups, and best expression of personal or group identities. Redefining Identity features work by undergraduate and graduate students at the Penny W. Stamps School of Art & Design and across the U-M campus.

Reception: Monday, January 16, 2017 from 7 - 8 pm

PRISON CREATIVE ARTS PROJECT (PCAP)

MARCH 22 - APRIL 5, 2017
DUDERSTADT CENTER GALLERY

2017 3 26 PCAP Exhibit poster 1 IMG_8952

The Annual Exhibition of Art by Michigan Prisoners is one of the largest exhibitions of art by incarcerated artists in the country. Each year, faculty, staff and students from the University of Michigan travel to correctional facilities across Michigan and select work for the exhibition while providing feedback and critique that strengthens artist's work and builds community around art making inside prisons.

BICENTENNIAL COMMUNITY OF CULTURES

MARCH 31 - APRIL 14, 2017
DUDERSTADT CENTER & PIERPONT COMMONS

Community of Cultures Festival

A Bicentennial Celebration of U-M's diversity: with performances, a variety of ethnic foods and presentations by student cultural organizations. There will be exhibits, conversation circles, TED-style talks, a Title IX presentation, information and activity stations, a Cube art project, photo booth, giveaways, and University VIPs.

The festival is part of the UMich200 Spring Festival.

LIVING ARTS EXHIBIT

LIVING ARTS STUDENTS

APRIL 8 - 13, 2017

DUDERSTADT CENTER GALLERY

2017 4 19 Creative Process class exhibit IMG_9119

Living Arts is about sharing ideas and approaches to creating in an interdisciplinary environment. The Collaborative Creative Projects bring together groups of students in a variety of disciplines within the community, for the purpose of creating something new, interesting or compelling by sharing their different talents and abilities with each other. Students have been working throughout the year in interdisciplinary teams on various projects with guest artists and faculty. The Collaborate Creative Projects allow our students to take what they have learned and stretch their wings on their own with guidance from ArtsEngine staff, working through phases of creative process to address a given topic or problem.

This year our projects are focused on the ArtsEngine facilitated UpstART 200: A U-M Bicentennial Project of Student and Alumni Reflection and Making (More info on the project may be found at <http://artsengine.umich.edu/bicentennial.php>). Each Living Arts student team has chosen one (or more) U-M artifact from an archive of art, design or architecture to inspire their project. Each completed project will be entered into consideration for permanent placement in the print and digital publication, Student and Alumni Reflections from the U-M Bicentennial, in Winter 2018.

WONDERS OF LEARNING

UM WORK/LIVE PROGRAMS - REGGIO EMILIA ALLIANCE

MAY 22 - JUNE 30, 2017

DUDERSTADT CENTER GALLERY

The Wonder of Learning—The Hundred Languages of Children
Stamps School of Art & Design Work Commons

In 1991, Newsweek hailed the preschools and infant-toddler centers of the municipality of Reggio Emilia, Italy as among the best in the world. International acclaim and interest followed, and “The Hundred Languages of Children” exhibition was created to inform the world about the work of the children and teachers of Reggio Emilia. Today this exhibit travels across the world and it continues to be acclaimed as an excellent educational approach for young children, both in Italy and across the world. The exhibit has travelled to 31 countries, including 40 cities in the United States. In each location, the exhibit has contributed to an increased understanding of the transformative power of early childhood education for all children.

This exhibit provides valuable evidence about the difference a rich, child-centered early learning environment can make in the lives of children. Such evidence is critical as we engage in a national debate around standards, testing and what kinds of educational programs best serve our children. The exhibition will help communities, educators, policy makers and families understand the enormous potential of early learning experiences as well as the lasting impact of effective early childhood and elementary education programs.

The Wonder of Learning—The Hundred Languages of Children exhibit at the University of Michigan is cosponsored by the University of Michigan Children’s Centers and the University of Michigan Dearborn Early Childhood Education Center in partnership with the Penny W. Stamps School of Art & Design and the James and Anne Duderstadt Center.

Hosted in conjunction with the university’s bicentennial year celebration of U-M’s core values of intellectual leadership and innovation, public service, academic freedom and integrity, diversity and commitment to the combined mission of education, research and service, The Wonder of Learning exhibit is a catalyst for far-reaching change in how societies value early learning as a tool for making the world a better place. Free and open to the public.

ENERGY & EMISSIONS COMPETITION

COLLEGE OF ENGINEERING STUDENT COMPETITION

NOVEMBER 27 - DECEMBER 9, 2017
DUDERSTADT CENTER GALLERY

2017 12 6 Energy+Emissions Competition_145632

Student teams conceptualize U-M's emissions in Energy + Challenge

In 2016, the University of Michigan emitted 641,000 metric tons, or 1,413,161,420 pounds, of carbon dioxide. This represents approximately 30% of Ann Arbor's total emissions footprint.

This fall, student teams battled to best conceptualize what 641,000 tons actually looks like during the Energy + competition, which culminated in a judging session this week at the Duderstadt Center. The challenge, offered by the Energy Institute and the Duderstadt Media Commons, sought to demonstrate to students the interconnectedness of energy with the built environment, the climate, and the centrality of energy in society.

At Duderstadt, a tower of toy cars dominated the building's art gallery. A computer beckoned invitingly, offering a 3D map of campus. A box of balloons- the size of a garden shed- awaited explanation.
