MiND

MUSIC in NEURAL DIMENSIONS
DUDERSTADT CENTER VIDEO STUDIO
APRIL 15th - 16th, 8 PM 2011

The world premiere of the MiND Ensemble explores an uncharted realm of new media performance, as the conscious and subconscious minds of the performers become the very fabric of creation. Be there as imagination becomes tangible, while hopes and fears are brought to life through EEG brainwave scanning technology.

This FREE event has been generously supported by the Yahoo! Boost award and Design Lab One.
